The background of the cover is a vibrant cosmic scene. It features a deep blue and purple space filled with numerous stars of varying brightness. Several prominent spiral and elliptical galaxies are visible, some glowing with red and orange hues, suggesting active star formation or distant light. Diagonal streaks of light, possibly representing distant galaxies or light trails, cut across the frame. A bright, multi-colored nebula or star-forming region is located in the lower-left quadrant, emitting intense blue, green, and red light.

Introduction

HeruScopes© incorporates Kemetic, Olmec, the 13th Zodiac, and sometimes Vedic (East Indian) Astrology Systems, and is based upon the TRUE Sidereal Motions of the Sun and Planets through the Constellations of the Zodiac, along the Ecliptic.

HeruScopes© can sometimes include Asteroids, Comets, the Orisha, Ophiuchus, which resides between Scorpio and Sagittarius, and also the Sacred Hoop (Sirius, Pleiades, and Orion) using the NASA Horizons (Heru Vision) Ephemeris.

HeruScopes are most powerful when combined with KemeTones: Cosmic Sound Healing.

from the cosmic path “Saturn in your birth chart reveals the place where you must learn to be more mature in your approach, it points to where your fears are, where you tend to repeat mistakes, and therefore feel inadequate, or handicapped. Saturn can be the voice of your conscience, the remnants of a parent who restricted you or limited you in early childhood. The planet is known as The Great Teacher, Fate or Karma, and Father Time, because it puts you through repetitive cycles that turn out to be lessons in becoming responsible for yourself. Saturn functions on the social level of our experience (along with Jupiter), and it represents the place where you feel social stigma, less than adequate with regard to others, where you feel judged by others, or afraid to assert yourself for fear of social rapprochement. Eventually, Saturn bestows personal authority in those areas where you feel most limited, because the discomfort causes you to learn how to deal with the issues that repress you and hold you back.”

The moon represents our ego, our character. Intuition. It defines our relationships in life, our constitution, our finances, and our relationships with siblings and family." pg. 87. Rebirth through Loss, Grieving and Metamorphosis. Face the future you have created through the past. Asar, the Soul, was resurrected into Eternity thanks to Aset, Divine Intuition, Lady of Wisdom and Healing Words of Power.

Sedna:

represents overcoming Trauma and betrayal through self love and forgiveness. Helps us across difficult waters and through trying times...be careful what you wish for” syndrome; selfishness and greed hurt everyone; When we’re forced to let go of something we feel victimized, powerless, and that life is unfair, which it is.

<http://darkstarastronomy.com/sedna/> “The lesson here is not to accept being the victim, to turn the situation round and turn an extreme negative into an extreme positive. “

“Sedna’s myth may exemplify a female who does not want to commit in marriage, participate with men, or even be here on Earth, due to her fear of being hurt—an unresolved issue or molding from her unfortunate past, one that only perpetuates a life of loneliness. “ [Lunar Planner]

Mike Brown of Caltech commented on the naming of Sedna “Our newly discovered object is the coldest most distant place known in the solar system, so we feel it is appropriate to name it in honor of Sedna, the Inuit goddess of the sea, who is thought to live at the bottom of the frigid arctic ocean.”

“The encounter with what has been lost, drowned out, or frozen long ago... In other words, our own ‘Ice Age’: the wounds in the soul caused by the impatience, condemnation, dismissal or anger of the father; the living hell of unresolved outrage; the violence of hardship where we cut off from what is desperate and vulnerable in ourselves or others in order to survive. “ [Melanie Reinhart, in her article “The Goddess of the Frozen Waters.”]

"Sedna swims into your life to tell you to stop being a victim. The way to wholeness is to recognize how you've been caught up in and are living the victim archetype, then to change the pattern by empowering yourself. Are you fond of saying, "Why is this happening to me?" Don't get stuck in the "why". ... Sedna says we have all been victimized by something, by patriarchal institutions, discrimination based on race, gender, sexual preference, religion, or color. She encourages you to claim your power " [Lynn Koiner]

"The goddess Sedna teaches us that we must delve into the dark, cold places that we fear most if we are to find the riches that rest there. Sedna reminds us that, in spite of all our infirmities and our foolish mistakes, we are still worthy of love and respect and have every right to expect, and even demand, that others treat us well" [Goddess Gift]

http://www.cornerstone-astrology.com/articles/astrology_sedna.htm it seems that the arrival of Sedna is set to coincide with an increased spiritual thrust that will be felt by humanity as a whole.

Sedna takes approximately one hundred years to travel through thirty degrees of the zodiac. (i.e. one zodiac sign) so like the three transcendental planets (Pluto, Uranus and Neptune) her effects will be felt most strongly by humanity as a whole – unless there are any strong contacts in the natal chart. Transiting planets in our charts will also activate Sedna's influences though, opening our awareness of the unknown and the vastness of the universe. The role of Sedna seems to be to move humanity to the next level of cosmic awareness.

From 1865 through till 1966 Sedna travelled through Aries. This hundred year period saw the emancipation of women around the world, beginning with the forming of the suffragist movement and ending with the bra burning women's libbers of the sixties. This seems an appropriate illustration of the collective influence that Sedna has. (Remember as a goddess in the myth, she cared for her people as a collective)

In 1966 Sedna gradually made her way into Taurus, where she remains today. So what can Sedna in Taurus hold for the collective influence of humanity? Taurus governs things that we value, to my thinking it is likely that our values will change and become increasingly orientated towards spiritual considerations during the next hundred years.

The Goddesses: Asteroids

The first Asteroid, Aset/Ceres, was discovered in 1801, and herald in the rise of the Divine feminine Consciousness. Now there was more space for the feminine celestial archetypes, to balance out the preponderance of male archetypes. The first hundred were named after Goddesses, and there seems to be no end in sight.... learn more at neptunecafe <http://www.alwaysastrology.com/asteroids.html>

The asteroids were all named after the female family of Jupiter. Ceres his sister, Juno his wife, Pallas Athena his daughter and Vesta another sister. Much of the feminine is left out of astrology aside from Venus and the Moon. The asteroids help add the feminine back into the astrological chart.

Aset/ Ceres

Ceres was the first to be discovered in the asteroid belt. It has since been reclassified as a dwarf planet, which would make Ceres at least as important as Pluto in the astrological chart since they are both dwarf planets.

Ceres was the sister of Zeus (Jupiter). She is the quintessential Earth Mother, and rules over food, cooking and nutrition. Wherever she appears in your chart, she shows how best you feel nurtured. This is also the area where you can easily provide love and comfort.

Your Ceres Sign influences mothering, hard work, parenting, and gardening as well. It will show how well we go with the flow... the universal one, that is. This is the unification of both giving and receiving through ourselves as an exchange of energy. Ceres is associated with fertility, the uterus and stomach. On her negative side, she influences grief, work problems, eating disorders, custody issues and kidnapping. She may influence low self esteem, fear of abundance, feelings of abandonment or unworthiness, over-attachment, possessiveness, parent-child complexes and barrenness.

Aset is the Goddess of Wisdom, Healing Words of Power, the Divine Mother, and Divine Intuition.

Net/ Pallas Athena

Pallas Athena was the second asteroid discovered. Named after Jupiter's daughter, Pallas Athena is intelligent and cerebral. She is the weaver of patterns, linking ideas together. She is strategic command in both the warrior and the peaceful general.

Cities are her domain. She has an interconnection with Libra because of her focus on ideas. Like Libra, she can see both sides. She is not blind justice... she is only just. She is creative and artistic. She is a survivor. She expects everyone to claim their personal power.

Where her influence falls is where you will find talents in the following areas. Jupiter's daughter carries influence over many things, such as the immune system, the arts, the father/daughter relationship, intuition, justice, wisdom, defense, horses and the kidneys.

With her spotlight on daddy's little girl, Pallas Athena will help determine how you interpret your relationship with your father, and in turn how you treat all males in general. On her negative side, Pallas Athena touches on conflict, legal battles, injustice and illnesses due to a weakened immune system.

Net or Neith is the Goddess of War and Protection,

Juno

Juno was the third asteroid to be discovered. Juno is the wife of Jupiter. She has some similarities to Venus, but while Venus sparks that initial attraction, Juno makes the commitment. She sings of soul mates. As she moves through the sky, the face of relationships change, but she still stands for commitment of one kind or another.

Where you find Juno in your chart is where you may meet someone that you will remain with for a long relationship. She covers marriage, fashion and beauty. She is the patron of relationships and true love. Diplomacy is part of her sphere.

She has influence with the weather, flowers, fairness and female genitalia. She also dealt with many of Jupiter's infidelities, and thus has influence over the negative issues of spouse abuse, powerlessness, women's rights (both positive and negative), rage, inferiority complexes and unfairness. She may also affect issues of denial, betrayal, inequality and of course bitterness.

Vesta

Vesta is the second largest asteroid in our solar system and the fourth to be discovered. Vesta is a sister of Jupiter, the virgin goddess. Vesta is the keeper of the hearth. She is focus and dedication. She is mental clarity and self-respect.

Vesta brings out your purest potential and Essence into being. Vesta is organized and perfect. She has a talent for breaking things down into its components. She rules the metabolism and the upper intestine. She carries influence over locks and keys, sisters, security, investments, insurance, and inheritance. She is the epitome of the home and family, ritual, chastity and sexuality, and devotion.

Her negative aspects include insecurity, lack of focus, promiscuity, segregation, secret societies and family troubles. There may be a fear of sex or intimacy, as well as an invalidation of self. Denial can be a big aspect when she is negative.

Chiron: The Wounded Healer.

Closely associated with Ophiuchus, as this was his student. from <http://www.cafeastrology.com/chiron.html> "is a comet with a unique and erratic orbit. In the natal chart, Chiron is symbolized by the "wounded healer". It represents our deepest wound, and our efforts to heal the wound. Chiron was named after the centaur in Greek mythology who was a healer and teacher who, ironically, could not heal himself.

Chiron in our natal charts points to where we have healing powers as the result of our own deep spiritual wounds. We may over-compensate in these areas of life. Chiron, as a wounded healer, first must face issues of low self-worth and feelings of inadequacy and learn to rise above these issues. Because the wound goes deep, and we may work hard to overcome the wound, healing powers are potent." <http://www.alwaysastrology.com/asteroids.html>

Chiron deals with all aspects of health and disease and how they affect our spiritual path. Chiron in our charts shows where we are on a quest for healing and wholeness. As we follow that quest, we find how we can serve particular others in their own quest for well-being. M. Kelley Hunter

Chiron was wounded himself, and despite his great skills, he never healed. He symbolizes everyone who finds their strength through their suffering. Everyone gets wounded in some manner. Whatever our wounds are, Chiron influences us to overcome our condition and go on. Like Chiron, we may find that in healing others we gain some insight and salvation even though we are unable to fully heal ourselves.

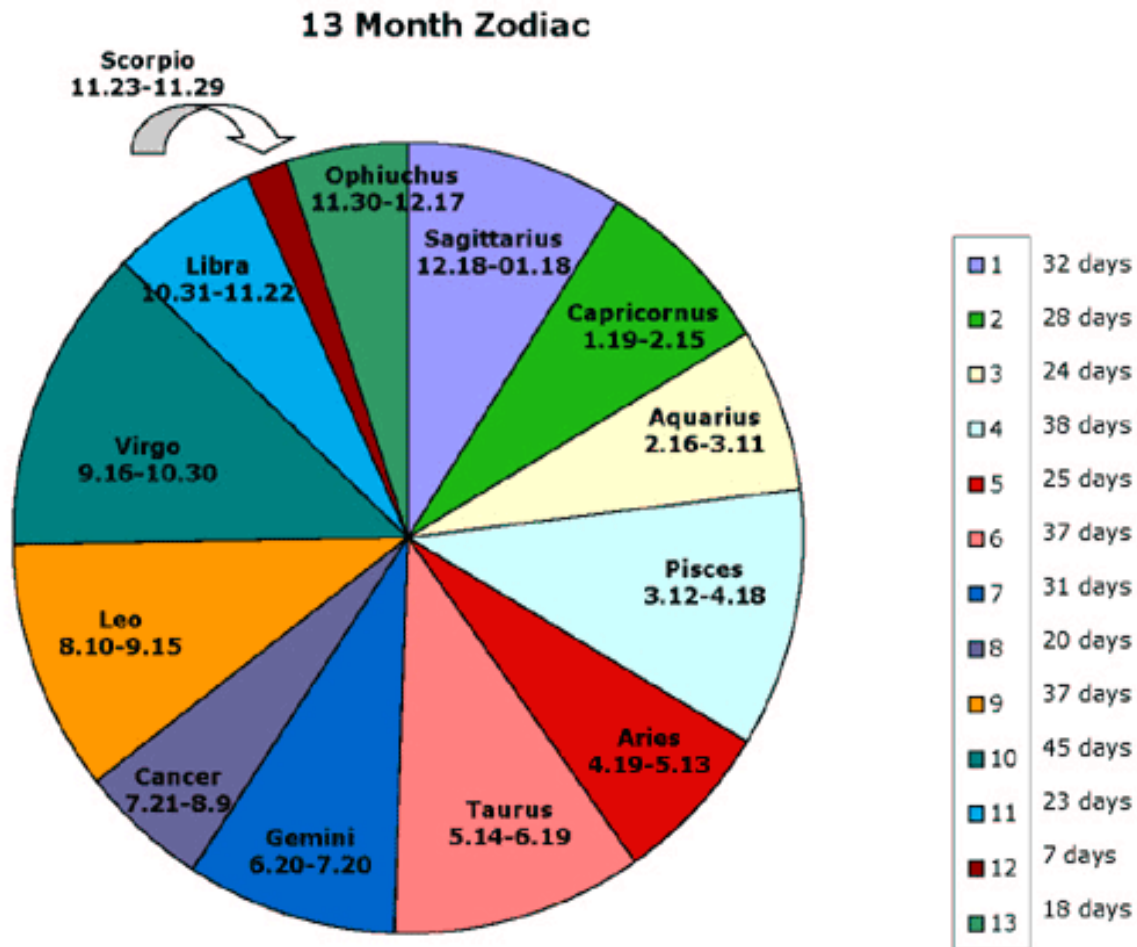

Chiron has an unusual orbit, rather like Pluto. Many astrologers think of Chiron as a "mediator" between Uranus and Saturn. Chiron gives wisdom and patience as well as mastery over the darkness of our souls. Our wounds are gifts when looked at from a different angle. They give us character, lessons in life and perseverance. Chiron teaches us these things whether we are ready to learn them or not. Chiron is the Key.....

This school says it is ruled by Mars, due to the nature of Set, and the journey to overcome lower nature and become in service to rather than the destruction of.

What about the Scorpion Goddess?

From <https://www.ancient.eu/Serket/>

"**Serket** (also known as Serqet, Selkis, and **Selket**) is an **Egyptian** goddess of protection associated with the scorpion. She was worshipped widely in Lower **Egypt** as a great Mother Goddess in the Predynastic Period (c. 6000- c. 3150 BCE) and so is among the older deities of Egypt. She is associated with healing, magic, and protection, and her name means "She Who Causes the Throat to Breathe". Her symbols are the scorpion, the **Ankh**, and the *Was* Sceptre, all of which convey her benevolent aspects. In the Predynastic Period, she was the protector of the Kings as evidenced by archaeological finds linking her by the name Serqet to the Scorpion Kings, defeated at some point around the reign of **Narmer** (c. 3150 BCE). During that period she was already closely associated with protection and her worship had grown from the Delta Region of Lower Egypt to the **cities** of Upper Egypt.

By the time of the First Dynasty (c. 3150-2890 BCE) she was associated with the god Nun (also known as Nu), the Father of the Gods. Nun was the watery abyss from which the primordial hill (the *ben-ben*) rose on which Atum (Ra) stood at the dawn of creation. It is unclear what role she played, if any, in the creation of the world, but evidence suggests she may have been the wife of Atum, the first son of Nun, or even the wife of Nun himself. Later, she is represented as one of the deities aboard the barge of the sun god Ra, who watch out for the serpent **Apophis** as the boat sails through the night sky"

Also known as Asclepius, associated with Chiron, the Wounded healer: Ophiuchus was his teacher. If this shows up in your chart, might be time to take that holistic certification or training and get to work at your new life as a light worker. Or, to go deep within your own healing, and become activated as a healer to help others to do the same: HEAL THY SELF!
